183000	54	22	50	40	23	M10

Appearance	
<ul style="list-style-type: none"> Elastomer (default natural rubber, NK) <ul style="list-style-type: none"> – Operation temperature -40 - +80 °C – Should not be used at oil, alkaline, acid – You can find other opportunities at the Elastomer 	2
<ul style="list-style-type: none"> Hardness (default 55 +/-5 Shore A) <ul style="list-style-type: none"> – 40 (soft) – 55 (medium) – 70 (hard) 	3
<ul style="list-style-type: none"> Metal insert <ul style="list-style-type: none"> – ST37 (galvanized, DIN EN 12329 – Fe//Zn12//A) 	4

Use
The benefit of this part is, that the axial load makes the „U“ holder for the shear stress. So this function ensure long life for the structure.

U shaped vibration damper
